" LIBRARY NEWS "

We are now working on a club library. Anyone wishing to donate books, (anything to do with motorcycles), are welcome to do so. A raffle will be held each month to raise money to buy new books. For example, 50¢ a ticket for a Mickey or something else of value. John and Pat Choquette have volunteered to be our librarians. Books may be taken out at each club meeting and may be kept for one month.

Any members who have pictures of club runs, shows, or any other club activities for our club album, please bring them in to John or Pat. The club will pay you for any of these photos or negatives.

We are also trying to compile a list of motorcycle clubs, single make clubs and registers, and any special interest club that have anything to do with motorcycling (mainly anything to do with antique motorcycling). If you have any addresses, give them to Pat or John who will put them on a list for reference for all members.

MOTORCYCLE MATTERS

by

Bert Bentley

To make a start on this fascinating subject, I would , firstly, like to say that motorcycles were in fact the first vehicles propelled by the internal combustion engine, as Gottlieb Daimler constructed a practical self-propelled two-wheeler as early as 1885. Like its descendent, the motor car, motorcycles have been produced in many lands and by many firms and some weird and wonderful contrivances have been produced in the past 90 years. Most of you are aware that the several thousand of different makes of motor cars have been produced, but are you aware that during the same period motorcycles were also produced by a great many firms, some of which survive today. How many of the following makes of motorcycles and scooters do you recognize?
